

# ADAM LAURENCE MEADOWS

**Date of Birth** 1993  
**Email** adam@cloudam.co.uk  
**Driving License** Full UK & Business insurance

## Personal Statement

I am proficient in Java with over 7 years of professional experience on a mixture of legacy and new solutions with over 12 years of programming knowledge. I am committed to delivering high quality code and improving the quality of the product.

## SKILLS

- Java 14
- Spring Boot
- Microservices architecture
- VueJS, Nuxt.js, JS & JQuery
- Relational & noSQL databases
- Docker
- Devops, Networking & Integrating hardware
- Requirements gathering

## TOOLS

- AWS
- Windows, Linux & MacOS
- GIT, GitHub & SVN
- REST & working with API's
- JIRA, Confluence, review tools
- CI/CD
- IntelliJ
- Route 53, DNS, networking

## EMPLOYMENT HISTORY

**2019 -** Department of Work and Pension through Infinity Works  
**Full Stack Developer**

Working in part with a very large team to implement features based on government policy and business requirements

- Working in a very large organisation, split into smaller feature teams. Each responsible for multiple areas.
- With well over 5 million users. Meaning every change matters so we follow strict TDD & Pair programming practices.
- Following DDD and clean code practices.
- Overseeing and resolving production incidents, which involve real people so each incident is a priority.
- Created core calculation code which runs over 15 million times a month.
- Created and supported the kickstart scheme implementation.

**2019 -** CloudAm  
**Director**

Decided to start my own business to explore my own desire to work more flexible while working on my own projects.

- Managing all paperwork, admin, marketing and networking to stay running effectively.
- Created and marketing fully self managed Track and Trace system, built using Nuxt.JS, Spring Boot, mongo and hosted on ECS.
- Activity developing a Customer Journey management system.
- Setting up development pipelines for all applications. AWS amplify on the company's website.

**2019 - 2019** J&C Hendrick UK  
**Technical Architect / Full Stack Developer**

Solely responsible for creating an enterprise cloud solution to manage customers in multiple locations. I wrote both the frontend and backend.

- Created and implemented everything inside AWS infrastructure, including all code pipelines, CD to dev servers, database changes, Route 53 networking, load balancing, security, auth and much more.
- Dockerised every microservice to deploy inside ECS which achieved scalability.
- Unit tested every part of the application with full coverage following TDD practices.

- Front end developed in VueJS components.
- Integrating third party hardware printers into a microservice, allowing customers to quickly get feedback from the application.
- Created multiple media facing screens for the public to interact with.
- Started as a side project to fix a real world issue, then got taken over by J&C Hendrick.

**2016-2018**

**Qmatic**

**Application Developer**

- Technical lead on many projects including working very closely with the largest furniture retailer.
- Managing the whole of the UK's AWS infrastructure.
- Attended many customer facing meetings to design solution and architecture
- Working closely with the support team, who support legacy solutions. Acting as 2nd line before it gets escalated globally.
- Working with both proprietary hardware and software. I have acquired strong networking knowledge.
- Created multiple applications that are in production globally. Which are an integral part of the solution.
- Maintaining & developing many legacy Javascript applications.
- Collaborating with all the global developers and sharing knowledge and code
- Creating client facing data reports.

**2014-2016**

**EDW Technology**

**Junior Java Developer**

- Extensive use of Java on a legacy system, used to create both client and server side code.
- Daily use of TDD using JUnit and running through integration tests.
- Fixing defects raised under SLA on support work, or large project work.
- Part of the Code Review Team, build team and the TechQA team.

**2014**

**University of Bedfordshire**

**Student Ambassador**

**2010 – 2014**

**Acorn Pre-school, Shefford**

**Volunteer & play scheme assistant**

**EDUCATION / QUALIFICATIONS**

**2016**

**Oracle professional certification**

Oracle Certified Associate, Java SE 8 Programmer

**2012**

**Air Training Corps (ATC), Hitchin**

BTEC in public services

**2011 - 2014**

**University of Bedfordshire**

**Bsc (Hons)**

Computer Science

**2009 – 2011**

**Samuel Whitbread Community College, Shefford**

**A-Level**

Geography - History - Psychology

**2006 – 2011**

**Samuel Whitbread Community College, Shefford**

**GCSE**

Mathematics, Double Engineering, Double Science, English Language, English Literature Geography, MPSRE, Business Studies

**HOBBIES AND INTERESTS**

Maintaining and repairing both software and hardware computer issues, PC gaming, cycling, socialising and cinema. I have also been involved in developing and maintaining few game mods for a large community and have developed a few personal iOS applications.
